

MECHANICAL CONNECTORS AND REPAIR SLEEVES BSM

FOR LOW AND MEDIUM VOLTAGE APPLICATION UP TO 42 kV

KEY FEATURES

- Wide application range
- Compact design
- Can be used with almost every type of conductor and material
- Torque-controlled shear bolt heads guarantee an excellent electrical contact
- Easy installation with standard socket spanner
- Pre-engineered design for perfect fit in medium voltage cable accessories up to 42 kV
- Tested according to IEC 61238-1 class A

TE Connectivity's (TE) BSM mechanical connectors and repair sleeves are designed for use in low and medium voltage applications. Three sizes of our BSM connectors cover conductors sizes ranging from 25 mm^2 to 400 mm^2. Our connectors consist of a tin-plated body, shear bolt heads and inserts for small conductor sizes.

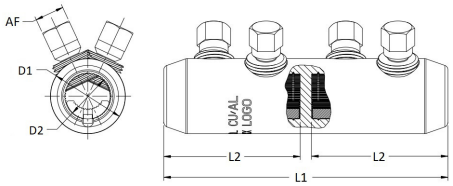

Made of special aluminium alloy, these contact bolts are double shear bolt heads with hexagon heads. The bolts are treated with a highly lubricating agent. Contact bolts are irremovable once their heads have been sheared off. The lug body is made of a high-tensile, tin-plated aluminium alloy. The internal surface of the conductor holes are grooved.

The connectors are chamfered at the edges and available with or without oil barrier (as blocked and unblocked types) depending on the application requirements. The bolted fitting featured herein was developed specifically for use in medium voltage cable accessories up to 42 kV. They may also be used in the 1 kV range.

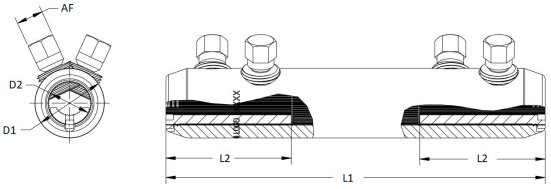

Before using mechanical connectors in cable accessories, confirm that they are suitable for the given application and if necessary consult our experts.

Customers can count on consistent, high quality products, driven by TE's proven innovation and backed by our extraordinary customer support.
