LPTC-V Series

Toroidal
Common Mode Chokes

The LPTC-V product Series are the continued expansion in the toroidal family of common mode chokes offered by Signal Transformer. These toroidal coils offer a wide variety of performance characteristics, designed around a UL94V-0 plastic cased ferrite core. All models are useful in various noise countermeasure applications such as power supplies, home appliances, IoT and AV equipment.

The LPTC-V Series of two-line common mode chokes are ideal for suppression of conductive EMI emissions as commonly found in many electronic circuit designs and offer a wide operating range of -55 °C to +125 °C. Custom versions are available upon request.

General Features

- Low DCR
- Wide range of inductance and current
- High impedance at low frequency
- Vertical design (no base)
- High temperature Operation
- Single layer wound coils
- Reach and RoHS compliant

Specifications

- 2 line common mode choke
- 0.51 to 25.5 mH Inductance range
- Current range 1 to 5 A
- Dielectric strength 3.75 kVrms
- Coil wound on UL94V-0 rated plastic cap
- Operating temperature -55°C to +125°C

Applications

- Power supplies
- Home appliances / IoT
- Audio-visual equipment

About Signal Transformer

Signal Transformer is known as the world's leader of wire wound magnetic solutions since 1959. With over 50 years of experience manufacturing transformers, chokes, inductors and custom or modified standard products. Signal offers not only the most comprehensive line of certified standard power conversion products, with our vast engineering, manufacturing and regulatory resources; Signal Transformer excels in the design and manufacturer of cost effective, specialized platforms.
